STAFF REPORT

Meeting Date: July 26, 2021

To: Honorable Board of Directors

Subject: Consideration of bid proposal from Doty Bros. Construction Company to Construct New Water Services for the 333 Hacienda Blvd Commercial Development.

Purpose - *To secure services for the installation of two (2) 10-inch fire services, one (1) 2-inch domestic water service, and one (1) 2-inch irrigation service for the property located at 333 Hacienda Boulevard, La Puente, CA 91744.*

Recommendation - *Authorize the General Manager to secure services from Doty Bros. Construction Company to construct the new water services.*

Procurement Analysis - *In accordance with The District's Purchasing Policy, Section C – Capital Projects Standards and Procedures, District staff received 3 proposals through a request for quotes process.*

Fiscal Impact - *A deposit for the labor, material, and services required to construct the improvements has been received from the developer. No impact to the Water Operations 2021-22 Fiscal Year Budget.*

Summary

District staff processes requests for new water services such as fire services, new meter connections and new fire hydrants; to support development projects within the LPVCWD service area. For these new service requests, the District requires a deposit for the cost of design and construction of the new facilities prior to constructing the improvements. Recently, the District received a request from a developer for the installation of two (2) 10-inch fire services, one (1) 2-inch domestic water service, and one (1) 2-inch irrigation service for the property located at 333 Hacienda Boulevard, La Puente, CA 91744. This location is within the LPVCWD service area and can be served by existing waterlines within close proximity of this location. District staff prepared a cost estimate for the installation of these new services and requested a deposit of \$59,000 from the developer.

District staff requested proposals from three different pipeline contractors. The three proposals are summarized in the table below:

Contractor	Proposal Amount
Doty Bros.	\$38,883.00
WA Rasic	\$58,224.00
Brkich	\$68,701.00

Doty Bros. Construction Company submitted the lowest proposal to construct the new water services.

A deposit from the developer in the amount of \$59,000 has been received. If the cost of construction exceeds the estimated cost, then the developer must pay the difference before water service is initiated. If the cost is less than the estimate, then the balance will be refunded to the developer. If approved, staff plans to begin construction as soon as the necessary materials have been obtained.

Fiscal Impact

The District received a deposit for the labor, material and services required to construct the improvements from the developer. No impact to the Water Operations 2021-22 Fiscal Year Budget.

Recommendation

Staff recommends that the Board authorize the General Manager to secure services from Doty Bros. Construction Company to construct the new water services.

Respectfully Submitted,

Paul Zampielo

Operations & Maintenance Superintendent

PROPOSAL

pzampiello@lapuentewater.com

April 7, 2021

**La Puente Valley County Water District
112 North First Street
La Puente, CA 91744**

**Reference: Install 2ea – 10” fire services (lead only) and 2ea – services
333 S. Hacienda Blvd – City of Industry
Proposal No. 10200413c REV2**

Attn: Paul Zampiello

Thank you for providing Doty Bros. Construction Co. (“DBCC”) with the opportunity to submit its price to perform its work on the above referenced project.

DBCC proposes to provide labor and equipment to install 2ea – new 10” fire services (lead only), 1ea – 2” domestic service and 1ea – irrigation service at 333 S. Hacienda Boulevard in the City of Industry. Our price includes restoration of the concrete (approx. 200 sf) as needed.

DBCC has prepared and submitted its proposal based on your email to Mike Clark on 04/13/2020. No other documents shall define DBCC’s work, nor have been considered in the preparation of its price.

DBCC proposes to provide its work for the following price:

1) Install 10” Fire Service (lead only) on Valley	\$ 10,915.00
2) Install 10” Fire Service (lead only) on Hacienda	\$ 10,915.00
3) Install 2” Domestic Service on Valley	\$ 4,815.00
4) Install 2” Irrigation Service on-site in back of property	\$ 4,815.00
5) <u>Restore Asphalt & Concrete</u>	<u>\$ 7,423.00</u>
Total Bid Price.....	\$ 38,883.00

For this proposal to be effective, we must receive your written acceptance within thirty (30) days from the date first written above. If your acceptance is not received within that period, this proposal shall be deemed revoked.

Doty Bros. Construction Co., (“DBCC”) hereby reserves its right to accept, reject, or negotiate applicable terms and conditions of any contract to be entered into, in good faith, with the customer upon award of the work, and by submission of this proposal DBCC shall not be bound to accept or perform the proposed work until terms are fully agreed to by both parties in writing.

This proposal is an offer to provide services under these exact terms only and is limited to acceptance of these exact terms without modification. Any additional or different terms in your acceptance will be construed as proposals and will not become part of our contract with you unless we agree in writing to your additional terms. Until receipt of written acceptance, we retain the right to change or withdraw this proposal based on scope, site or contract conditions or terms not previously known.

WE EXCLUDE THE FOLLOWING:

1. Costs for special permits or insurance, bonds, engineering, soil testing, field staking/survey, inspection, agency connection fees and/or assessments, or any City fees or charges.
2. Hydrostatic testing.

CLARIFICATIONS TO PROPOSAL:

- Our proposal is based upon shut-down for 10" fire service tie-ins to be completed at night (Premium time included), all other work to be completed during normal working hours (Monday through Friday 7:00 AM to 5:00 PM -- no overtime).
- All parts and materials to be provided by La Puente Valley County Water District.
- DBCC will not accept responsibility for damage to any unmarked or unknown substructures when reasonable care has been taken.
- If we encounter any soils or material that are considered hazardous or contaminated by the Federal Government, the State of California or any other agency having jurisdiction or authority, any and all costs for the handling, storage, transportation, disposal, etc., is to be treated as an extra to the contract. These additional costs and the responsibilities for these materials will be paid for and assumed by others.
- When rock is encountered that cannot be excavated efficiently with the backhoe used on the job, alternate methods or means will be employed to excavate said rock. Such alternate methods are defined as the use of (1) larger backhoes, (2) hand held pneumatic hammers, (3) mobile mounted impact hammer, (4) rock drills and blasting and/or any other methods as may be deemed required. All costs incurred due to these alternative methods will be handled on a Time and Material basis to the contract.
- Our proposal excludes tree removal, landscaping, irrigation, electrical and painting.
- Our proposal is based upon unapproved plans and is subject to revision based upon issuance of signed/approved plans.
- If a Performance Bond is required, one will be provided at a premium rate of 1.5%.
- This proposal is based upon release of all retention money within thirty (30) days after completion of Doty's scope of work and not overall project completion.
- Any work that we have completed and has been accepted by the City of the appropriate agency and invoiced in a calendar month, unless otherwise specified above, is due and payable the following month in full with no retention held. Any invoices not paid when due shall draw interest at the rate of 1 1/2% per month (18% per annum.) until paid. If this rate exceeds the maximum rate allowed by law, the maximum legal rate shall apply.
- In the event that this agreement is placed with an attorney to enforce its provisions, the prevailing party shall be entitled to reasonable attorney fees and costs.
- This price is subject to the starting of construction within 60 days from this date.
- Adequate access to work site to be provided by the Owner/Agency.

Doty Bros. Construction Co.
11232 E. Firestone Blvd.
Norwalk, CA 90650
telephone (562) 864-6566 facsimile (562) 929-9368

This proposal defines the scope and price, and time if any, for the performance of the work by DBCC. In the event that you wish to award this work to DBCC, please prepare and submit any contractual documents (including a copy of the Owner/Prime Contract, if applicable) to the Contracts Administration office of DBCC. Our Contracts department will work with you to put a contract in place in a timely manner.

DBCC can proceed to schedule its work, order materials and mobilize to perform as soon as a fully executed contract is in place, and the California Preliminary Notice information has been provided.

If you should have any questions or require further information, please do not hesitate to call our office.

Very truly yours,

A handwritten signature in blue ink, appearing to read 'Glen R. Pool'.

STAFF REPORT

Meeting Date: July 26, 2021

To: Honorable Board of Directors

Subject: Consideration of bid proposal from Brkich Construction Corporation to Construct New Water Services at 135-145 North First Street Housing Development.

Purpose - *To secure services for the installation of twenty-two (22) 1-inch domestic water services, one (1) 1-inch irrigation service, and one (1) 4-inch fire service for the property located at 135-145 North First Street, La Puente, CA 91744.*

Recommendation - *Authorize the General Manager to secure services from Brkich Construction Corporation to construct the new water services.*

Procurement Analysis - *In accordance with The District's Purchasing Policy, Section C – Capital Projects Standards and Procedures, District staff received 3 proposals through a request for quotes process.*

Fiscal Impact - *A deposit for the labor, material, and services required to construct the improvements has been received from the developer. No impact to the Water Operations 2021-22 Fiscal Year Budget.*

Summary

District staff processes requests for new water services such as fire services, new meter connections and new fire hydrants; to support development projects within the LPVCWD service area. For these new service requests, the District requires a deposit for the cost of design and construction of the new facilities prior to constructing the improvements. Recently, the District received a request from a developer for the installation of twenty-two (22) 1-inch domestic water services, one (1) 1-inch irrigation service, and one (1) 4-inch fire service for the property located at 135-145 North First Street, La Puente, CA 91744. This location is within the LPVCWD service area and can be served by existing waterlines within close proximity of this location. District staff prepared a cost estimate for the installation of these new services and requested a deposit of \$157,461.73 from the developer.

District staff requested proposals from three different pipeline contractors. The three proposals are summarized in the table below:

Contractor	Proposal Amount
Brkich Construction Corp.	\$65,845.00
Doty Bros. Construction Co.	\$99,887.00
WA Rasic Construction	\$108,361.00

Brkich Construction Corporation submitted the lowest proposal to construct the new water services.

A deposit from the developer in the amount of \$157,461.73 has been received. If the cost of construction exceeds the estimated cost, then the developer must pay the difference before water service is initiated. If the cost is less than the estimate, then the balance will be refunded to the developer. If approved, staff plans to begin construction as soon as the necessary materials have been obtained.

Fiscal Impact

The District received a deposit for the labor, material, and services required to construct the improvements from the developer. No impact to the Water Operations 2021-22 Fiscal Year Budget.

Recommendation

Staff recommends that the Board authorize the General Manager to secure services from Brkich Construction Corporation to construct the new water services.

BRKICH
CONSTRUCTION CORP.
founded 1969

March 11, 2021

Revised 7/21/2021

Paul Zampiello
La Puente Valley County Water District
112 N. First Street
La Puente, CA 91744

RE: Development at Glendora Avenue and Workman Street, La Puente

Robert Brkich Construction Corp. will provide labor equipment to install the following items:

- Make (2) 4-inch hot tap connections to the existing 16-inch water main.
- Install (1) 4-inch fire service lateral.
- Install a 4-inch lateral and manifold with (10) 1-inch services.
- Install (13) 1-inch services.

The total cost to complete all work is \$65,845.00.

The work will include: pothole the existing utilities in the work area; saw cut the existing asphalt/concrete surfaces; all excavations required to install the 4-inch fire service lateral, 4-inch PVC manifolds & 1-inch services; (5) hot tap connections to the existing water main; installation of fire service lateral, 4-inch PVC manifolds and 1-inch services; backfill the trench with 6" of sand under and 12" of sand over the pipe and the remainder of the trench with imported Class 2 base; haul away of all asphalt, concrete and native soils; trench restoration (trench width only); trench safety per OSHA requirements; BMP's, SWPPP's, chlorination and de-chlorination per NPDES requirements; pressure testing and required traffic control.

This proposal does not include piping materials, utility offsets, engineering, surveying, inspection fees, fire flow tests, permits, bonding, or working with contaminated soil. All of the above can be provided on a time and material basis.

Please call me if you have questions regarding this proposal or if you would like to schedule the work.

Sincerely,

Robert Brkich Construction Corp.

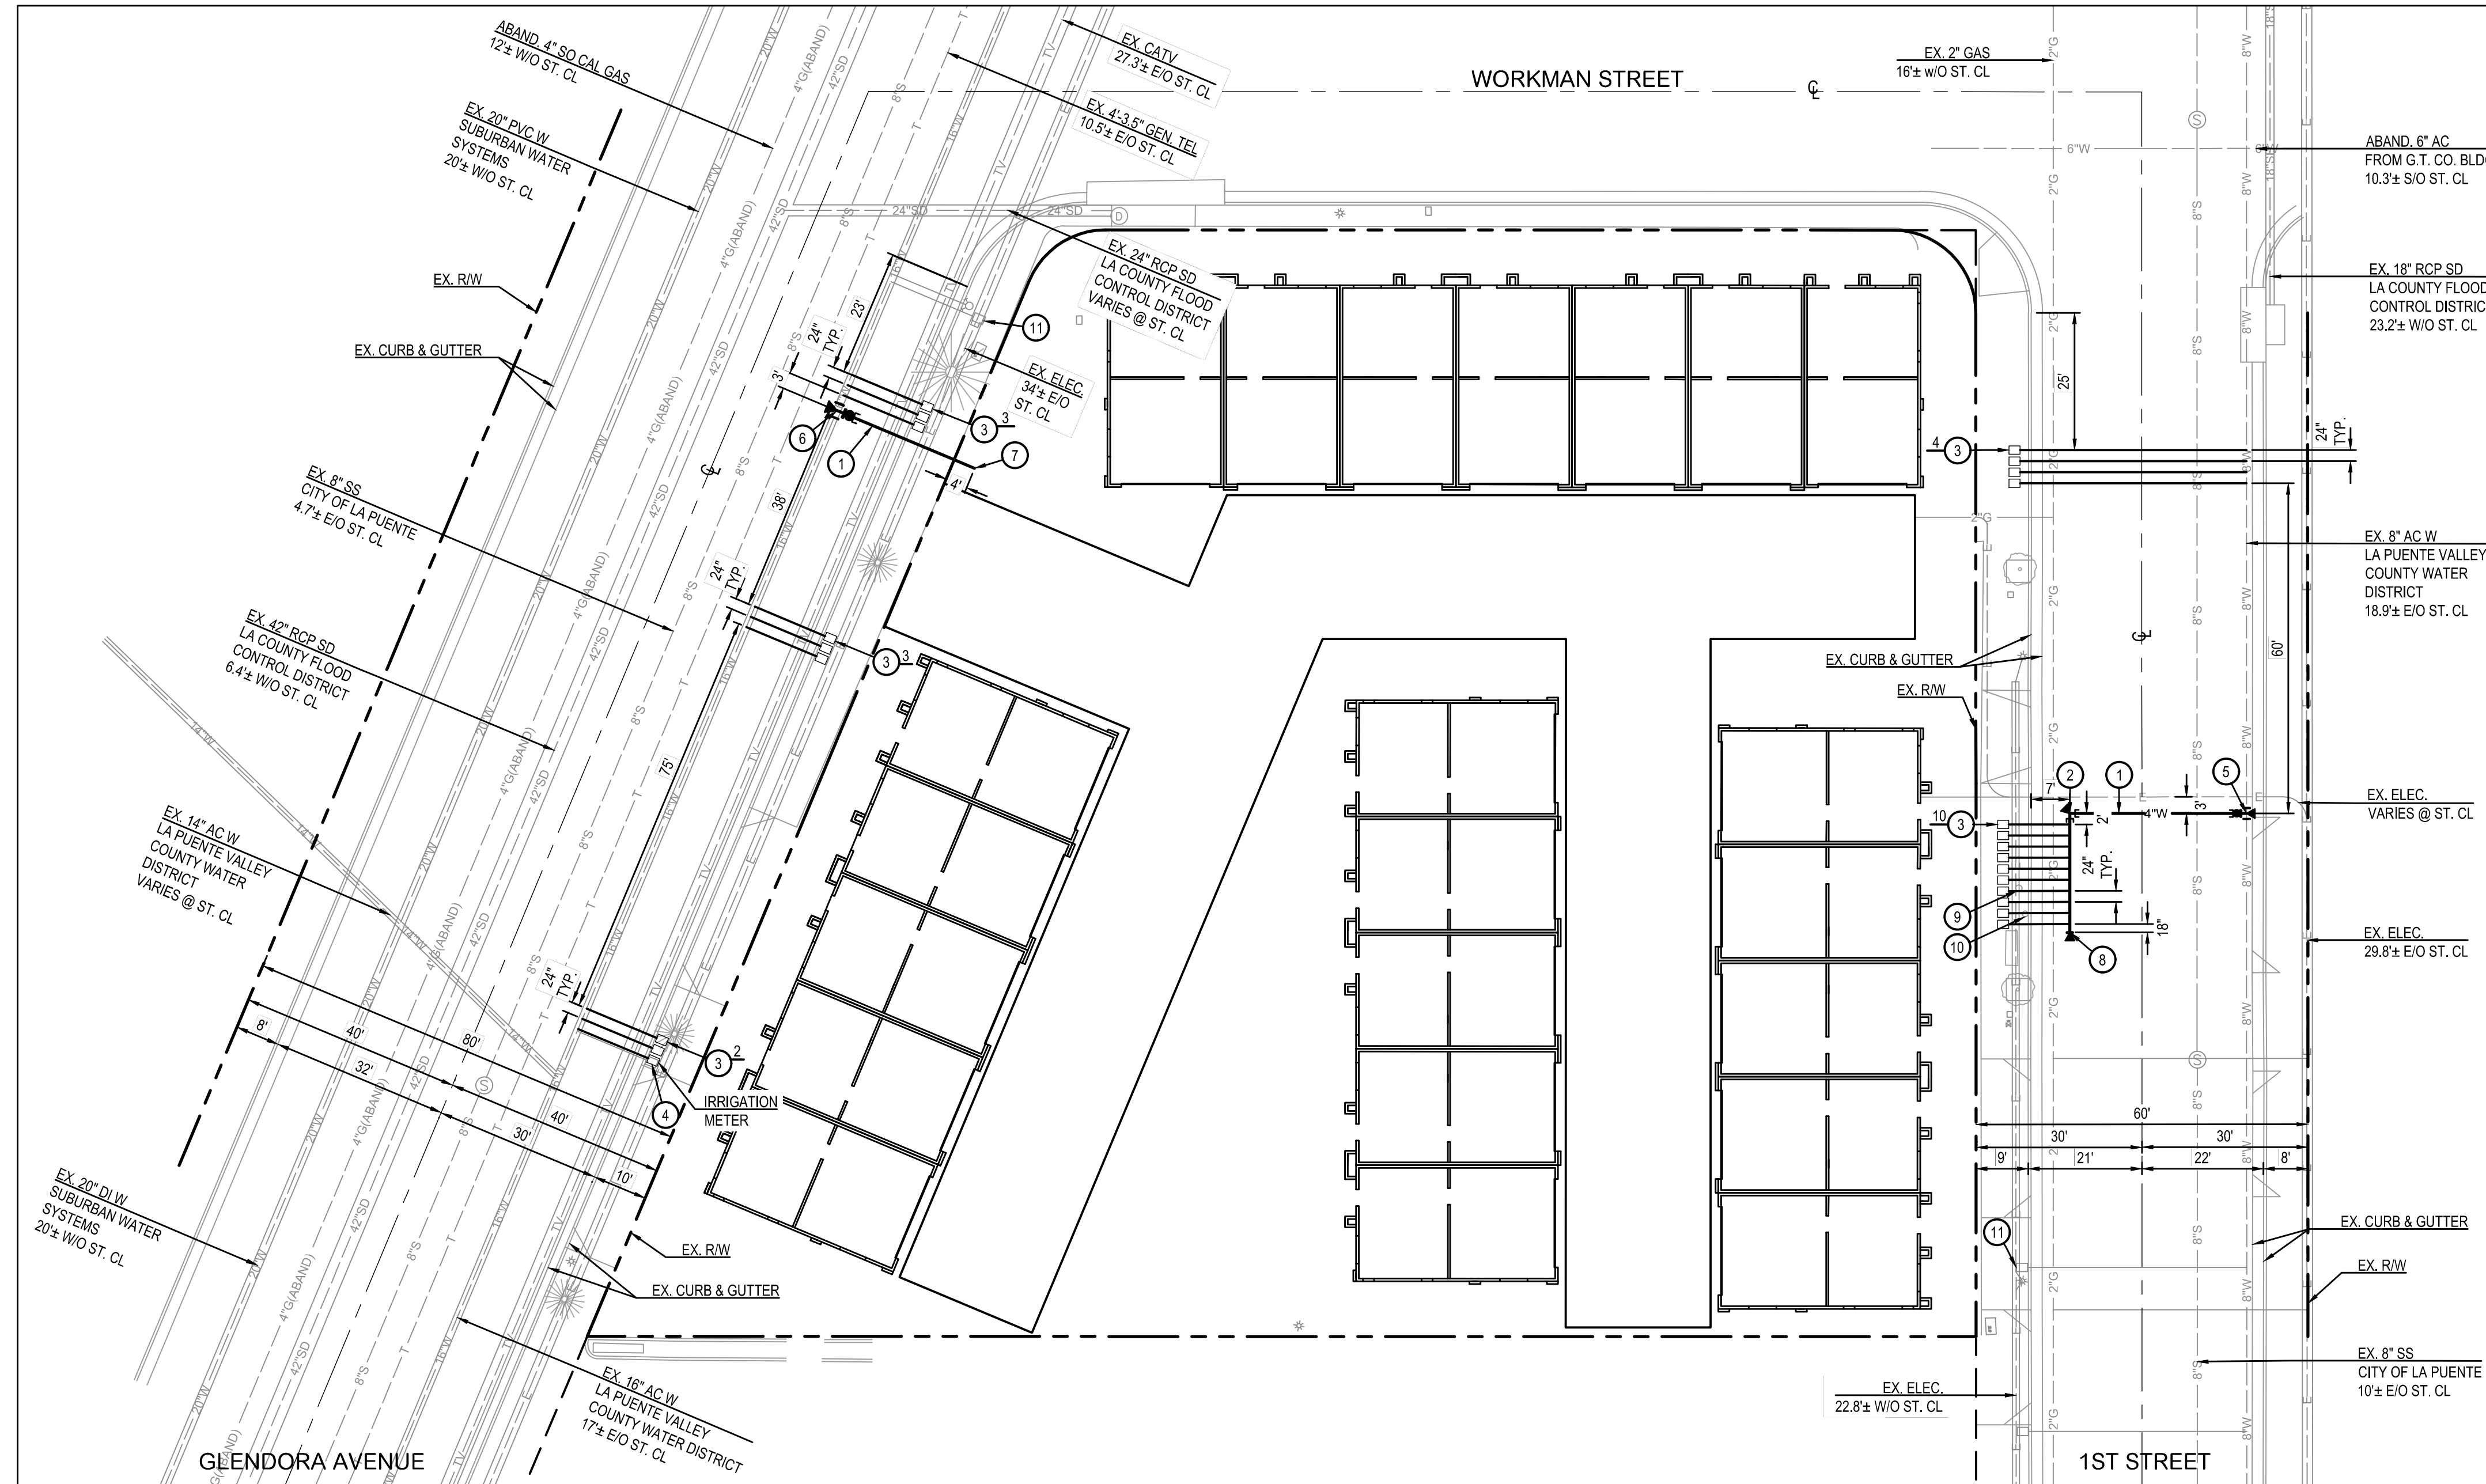

Robert Brkich, Jr
President

CONSTRUCTION NOTES:

- 1 FURNISH AND INSTALL 4" DUCTILE IRON PIPE PRESSURE CLASS 350, PER DETAIL 1 ON SHEET 4.
- 2 FURNISH AND INSTALL 4" 90° DUCTILE IRON BEND, WITH THRUST BLOCK PER DETAIL 2 ON SHEET 4.
- 3 FURNISH AND INSTALL WATER METER, METER BOX AND SERVICE LATERAL PER DETAIL 4 ON SHEET 4.
- 4 REMOVE AND REPLACE WATER METER, METER BOX AND SERVICE LATERAL PER DETAIL 4 ON SHEET 4.
- 5 FURNISH AND INSTALL 8" FULL COLLAR STEEL HOT-TAP SLEEVE WITH 4" TAPPING VALVE PER DETAIL 3 ON SHEET 4.
- 6 FURNISH AND INSTALL 16" FULL COLLAR STEEL HOT-TAP SLEEVE WITH 4" TAPPING VALVE PER DETAIL 3 ON SHEET 4.
- 7 STUB UP 6" ABOVE FINISHED GRADE AND FURNISH AND INSTALL 4" BLIND FLANGE.

Memo

To: Honorable Board of Directors
From: Paul Zampiello, Operations & Maintenance Superintendent
Date: July 26, 2021
Re: Monthly Operations & Compliance Report

The following report summarizes La Puente Valley County Water District (LPVCWD) and City of Industry Waterworks System (CIWS) operational and compliance activities of the previous month and since the last report to the Board. The report also includes the status of various projects for each system.

COVID-19 RESPONSE

In the District's continued response to COVID-19, field staff have a modified start-time schedule but are maintaining a full 8-hour shift to comply with the requirements of social distancing protocols. The schedule consists of employees working independently on maintenance activities for both water systems. When required to work together on leak repairs, field staff adhere to social distancing protocols and wear face coverings when near each other or the general public. Cleaning and disinfecting protocols have been instituted for all District vehicles, equipment, and facilities. The modified schedule and cleaning protocols have not caused any issues in completing the essential duties to operate and maintain both water systems.

DISTRIBUTION, SUPPLY AND PRODUCTION

- Monthly Water Production Summary – Total production from the LPVCWD Wellfield for the month of June was 264.76 AF, of which 106.12 AF was delivered to Suburban Water Systems. CIWS Well No. 5 produced a total of 190.23 AF in the month of June. The June Monthly Production Report is provided as **Attachment 1**.
- Well Water Levels and Pumping Rates - The latest static water level, pumping water level, and pumping rate for LPVCWD and CIWS are as shown in the table below.

Well	Static Water Level (Ft)	Pumping Water Level (Ft)	Drawdown (Ft)	Current GPM Pumping Rate	Specific Capacity
LPVCWD 2	157.5	195	37.5	1,417	37.8
LPVCWD 3	154	162	8	978	122.3
LPVCWD 5	142.5	183	40.5	2,414	59.6
COI 5	105	139	34	1,465	43.1

- Monthly Water Conservation – A summary of LPVCWD and CIWS water systems usage for the past 6 months as compared to the calendar year 2013 is shown below.

LPVCWD Monthly Water Consumption

Month	2013	2021	Difference Current-2013 (%)	Accumulative Difference (%)
January	115.58	104.30	-9.8%	-9.8%
February	112.08	98.86	-11.8%	-10.8%
March	135.08	114.52	-15.2%	-12.3%
April	153.73	133.22	-13.3%	-12.5%
May	174.40	147.93	-15.2%	-13.1%
June	185.13	159.35	-13.9%	-13.2%

CIWS Monthly Water Consumption

Month	2013	2021	Difference Current-2013 (%)	Accumulative Difference (%)
January	90.55	86.75	-4.2%	-4.2%
February	81.62	81.58	0.0%	-2.1%

WATER QUALITY / COMPLIANCE

- Distribution System Monitoring – District Staff collected all required water quality samples from the distribution system for the month of June; approximately 45 samples were collected. All results met State and Federal drinking water quality regulations.
- Source Monitoring – All water quality samples were collected from all the wells, as required. The table below summarizes LPVCWD Wells’ current water quality for constituents of concern. The Bimonthly Nitrate Concentrations for SP-6 and SP-10 is provided as *Attachment 2*.

Well Sampled	CTC	TCE	PCE	Perchlorate	1,4-Dioxane	NDMA	Nitrate
	MCL= 6 ppb	MCL= 5 ppb	MCL= 5 ppb	MCL=6 ppb	NL= 1 ppb	NL= 10 ppt	MCL=10 ppm
LPVCWD 2	ND	32	2.1	21	0.74	41	6.2
LPVCWD 3	1.4	ND	ND	8.9	ND	ND	9.1
LPVCWD 5	ND	ND	ND	13	ND	7.3	8.0

1. LPVCWD Recycled Water Project

- Staff is continuing to work to finalize securing the SCE easement for the pump station and access to the electrical transformer. When the easement is obtained, staff will begin preparing for the customer retrofit phase of the project. This portion of the project will consist of coordinating with the customer in the retrofit design, the LA County health department approval process and the construction phase.

2. LPVCWD PVOU IZ Project and SZ-South Project

- Staff has continued the coordination with RC Foster to prepare the initial testing phase of the new treatment plant. It is anticipated that the electrical and pipe testing will begin in late August.
- Staff continues to conduct bi-monthly meetings with DDW to discuss and review the new treatment plant's permitting and testing phase.

3. SCADA Upgrade Project – SCADA Upgrade Project - Staff continues to work with So Cal SCADA to implement a systemwide SCADA upgrade to the software and radio communications for all the water facilities. Staff has completed all of the necessary radio and electrical upgrades to accommodate the communication upgrades and new software. Over the next few weeks, So Cal SCADA will conduct workshops with staff to review updated new software configurations. It is anticipated that system testing will be conducted in late August and system implementation in September.

4. LPVCWD & CIWS Distribution Leak Repairs & Maintenance – Over the past several weeks, field staff has performed various replacements and leak repairs to the water distribution systems. They have repaired and replaced: 1 water service line, 4 mainline repairs, 5 meter curb stop valves, 2 fire hydrant replacements, and 3 meter replacements.

5. LPVCWD & CIWS Site and Facility Maintenance – Field staff performed an extensive clean up and organization of the storage facility at the Proctor yard. Staff also completed site maintenance at the Main St Reservoir site, which included removing spoil piles from previous construction activities.

6. LPVCWD & CIWS Valve Replacements - Over the past several months' field staff perform valve isolation replacements for several damaged and inoperable valves. These projects included replacing an 8-inch inline system valve on Dora Guzman Ave and the replacement of a 16-inch valve for the transmission of the Industry Hills reservoir transmission water line. Staff was able to perform these repairs with no operational impact and minimal water outages to customers.

7. CIWS Starhill Lane, 3rd Avenue, and Don Julian Waterline Improvement Project – T.E. Roberts, Inc. is scheduled to begin construction of the new waterline improvements starting with 3rd Ave and Starhill Lane at the end of July. Staff will be assisting with daily inspections to ensure technical specifications are being met during the construction of these improvements.

BOLETIN Informativo

Sirviendo a su Comunidad desde 1924

DISPONIBLE EN INGLÉS

Este boletín está disponible en Inglés. Contacte a nuestra oficina al 626-330-2126 para solicitar una copia.

NUESTRA OFICINA ESTÁ ABIERTA Y LISTA PARA SERVIRLE

¡Estamos abiertos! A partir del 6 de julio, el vestíbulo de LPVCWD reabrió al público. Nos complace atender sus necesidades de manera segura. Si planea visitarnos, tenga en cuenta:

- Se requiere el uso de mascarilla
- Podemos ayudar a una familia a la vez
- Aún están disponibles opciones de pago en línea seguras y convenientes

OPCIONES DE PAGO

Están disponibles las siguientes opciones de pago para todos los clientes:

- Pago en línea en www.lapuentewater.com
- Coloque su pago en el buzón de nuestra oficina 112 N. 1st Street, La Puente, CA 91744
- Envíe un cheque a P.O Box 3136, La Puente, CA 91744

DIFICULTADES FINANCIERAS

Si enfrenta dificultades financieras, puede llamar al Distrito y establecer un plan de pago para asegurarse de que su cuenta esté al corriente y que no haya interrupciones en el servicio.

YA ESTÁ DISPONIBLE EL INFORME DE CALIDAD DEL AGUA DE LPVCWD 2020

La Puente Valley County Water District se compromete a mantener informados a nuestros clientes sobre la calidad del agua potable segura y confiable que proporcionamos a sus hogares las 24 horas del día, los 7 días de la semana.

Nuestro Informe de Confianza del Consumidor de 2020 (CCR) es un informe anual sobre la calidad del agua potable que la Ley de Agua Potable Segura exige que los sistemas públicos de agua proporcionen a sus clientes. El CCR incluye información importante sobre el origen y la calidad de nuestra agua.

Para mayor información y ver el informe, visite:

lapuentewater.com/ccr.pdf

También tenemos copias impresas del informe en nuestra oficina del Distrito, 112 N. 1st St., La Puente.

CONOZCA A NUESTRO NUEVO GERENTE GENERAL, ROY FRAUSTO

Nos complace presentar a Roy Frausto como nuevo Gerente General de LPVCWD. Aporta educación y experiencia sobre el agua y un inmenso conocimiento del Distrito al trabajo.

Nuestra Junta Directiva acordó de manera unánime que Roy era la mejor opción para liderar el Distrito al embarcarnos en un capítulo nuevo. Tiene el conocimiento y la experiencia para llevar los proyectos actuales al éxito.

Anteriormente Roy trabajó para el Distrito del 2016 al 2019 como Gerente de Ingeniería y Cumplimiento. Recientemente regresó después de servir como Gerente de Ingeniería y Cumplimiento en el Distrito de Agua de Rowland. También ha desempeñado puestos de Ingeniería en el Distrito de Riego de South Montebello y en la División de Agua Potable de la Junta Estatal de Control de Recursos Hídricos.

El Sr. Frausto tiene un título de Ingeniería Civil de La Universidad de Los Ángeles y tiene una Maestría en Ciencias de Gestión de Ingeniería de Cal Poly Pomona

TIPS PARA CONSERVAR AGUA Y AYUDARLO A AHORRAR ESTE AÑO

California está experimentando una sequía histórica. ¡Los pequeños cambios ayudan a sumar grandes ahorros de agua! Compartimos algunas ideas para ayudarlo a conservar agua y dinero.

INTERIOR

Solo lave cargas completas en su lavadora y lavavajillas

Instale aireadores o limitadores de flujo en lavabos y regaderas

Busque fugas en su inodoro usando tinte o colorante para alimentos en el tanque

Revise sus grifos, cabezales de ducha y uniones de plomería en busca de fugas

EXTERIOR

Riegue temprano en la mañana o en la noche cuando las temperaturas son más frescas

Plante plantas nativas y de bajo consumo de agua, hermosas y amigables con el agua

Instale un controlador de riego basado en el clima o un controlador inteligente

Verifique que los rociadores no tengan exceso de rociado o fugas y ajústelos

WWW.LAPUENTEWATER.COM/WATER_SAVING_TIPS

PROYECTO DE TRATAMIENTO DE NITRATOS

El Distrito se está enfocando en el tratamiento de nitratos para continuar proporcionando un suministro de agua confiable en el futuro. El nitrato es un contaminante generalizado en las aguas subterráneas que se asocia en gran medida con prácticas agrícolas históricas y el uso de fertilizantes en los campos agrícolas.

En los últimos años, los niveles de nitrato en los Pozos 5, 3 y 2 del Distrito han tenido una tendencia creciente que ha resultado en un promedio de agua tratada cerca del 80% del Nivel Máximo de Contaminantes (MCL) de 10 mg/l para el nitrato. Para mitigar de manera proactiva el aumento de las concentraciones de nitratos y garantizar que tengamos un suministro adecuado de agua potable de calidad para nuestros clientes, tanto ahora como en el futuro, LPVCWD está trabajando con Evoqua Water Technologies para implementar un sistema de tratamiento de intercambio iónico regenerable (IX). El nuevo sistema de tratamiento se incorporará a la Instalación de Tratamiento existente del Distrito como se muestra a continuación:

1. Las torres de extracción de aire eliminan compuestos orgánicos volátiles (COV) a niveles no detectables.
2. Un sistema de intercambio iónico de un solo paso utiliza una resina específica para eliminar el perclorato.
3. Un sistema de intercambio de iones regenerable utiliza una resina específica para eliminar el nitrato.
4. Un sistema de inyección de peróxido de hidrógeno inyecta peróxido de hidrógeno en preparación para los reactores UV.
5. Los reactores UV tratan al NDMA y 1, 4-dioxano.
6. El agua que sale de la instalación se clora para proporcionar un desinfectante residual en el sistema de agua.
7. Luego, el agua tratada ingresa al sistema de agua y se entrega a su hogar.

La misión del Distrito de Agua del Condado de La Puente Valley es proporcionar a sus clientes agua de alta calidad para usos residenciales, comerciales, industriales y de protección contra incendios que cumpla o supere todos los estándares locales, estatales y federales, y brindar un servicio cortés y receptivo al costo más razonable. Debido a esto, LPVCWD mantiene una visión proactiva para garantizar un suministro de agua de alta calidad para su comunidad de hoy y de mañana.

LIMPIEZA DE AGUAS SUBTERRÁNEAS: INSTALACIÓN DE TRATAMIENTO DE PVOU-IZ EN ETAPAS FINALES DE CONSTRUCCIÓN

El Distrito ha estado trabajando con esmero en el área final de tratamiento de agua subterránea, la Unidad Operable de Puente Valley (PVOU) y nos complace anunciar que nuestro equipo de proyecto ha superado con éxito los requisitos de varias partes interesadas, incluida la USEPA y la Junta Regional de Control de Calidad del Agua - División de Agua Potable. El PVOU tiene tres sub-proyectos: la Zona Poco Profunda Norte, la Zona Poco Profunda Sur y la Zona Intermedia (PVOU IZ), que es la más crítica para prevenir la migración de contaminantes del agua.

Ya se terminó la construcción de pozos de extracción y tuberías de conducción, y la construcción de la planta de tratamiento va en aproximadamente un 90%. El remedio provisional PVOU IZ consta de siete pozos de agua subterránea. El agua subterránea extraída se transportará a través de más de tres millas de tuberías a una planta de tratamiento de tres millones de galones por día, que tratará el agua para uso potable como se muestra en el diagrama.

1. Carbón activado granular en fase líquida (LGAC)

Carbón activado granular en fase líquida (LGAC) para el tratamiento de compuestos orgánicos volátiles (COV)

2. Intercambio de iones de un solo paso (SPIX)

Resina de intercambio iónico (IX) para el tratamiento de perclorato

3. Inyección de peróxido de hidrógeno

Un sistema de inyección de peróxido de hidrógeno inyecta peróxido de hidrógeno en preparación para los reactores UV

4. Reactores Ultravioleta (UV)

Sistema de oxidación UV (UV/Ox) para el tratamiento de 1,4-dioxano

5. Ósmosis Inversa

Sistema de membrana de ósmosis inversa (RO) para la eliminación de sólidos e inorgánicos totales disueltos

6. Cloración

El agua que sale de la instalación se clora para proporcionar un desinfectante residual en el sistema de agua

7. Ingreso al sistema de agua

El agua tratada ingresa al sistema de agua y se entrega a su hogar

Se anticipa que la construcción se completará sustancialmente a fines de 2021. La finalización de este proyecto supone un gran avance para las generaciones futuras y nuestro compromiso con un suministro de agua confiable y de alta calidad.

Serving Your Community Since 1924

DISPONIBLE EN ESPAÑOL

Este boletín está disponible en Español. Contacte a nuestra oficina al 626-330-2126 para solicitar una copia.

OUR OFFICE IS OPEN AND READY TO SERVE YOU

We are open! Starting July 6, LPVCWD's lobby reopened to the public. We are pleased to safely serve your needs. If you plan to visit, please keep in mind:

- **Masks are required**
- **We can assist one family at a time**
- **Safe, convenient online payment options are still available**

PAYMENT OPTIONS

The following payment options are available to all customers:

- **Pay online at www.lapuentewater.com**
- **Place your payment in the drop box at our office 112 N. 1st Street, La Puente, CA 91744**
- **Mail a check to P.O. Box 3136, La Puente, CA 91744**

FINANCIAL HARDSHIPS

If you are facing financial hardships you can call the District and set up a payment plan to ensure your account is up to date and there will be no service interruptions.

2020 LPVCWD WATER QUALITY REPORT IS OUT NOW

La Puente Valley County Water District is committed to keeping our customers informed about the quality of the safe, reliable drinking water we provide to your homes 24/7.

Our 2020 Consumer Confidence Report (CCR) is an annual drinking water quality report that the Safe Drinking Water Act requires public water systems to provide to its customers. The CCR includes important information on where our water comes from and the quality of your water.

To learn more and view the report, visit:

lapuentewater.com/ccr.pdf

Hard copies of the report are also available at our District office, 112 N. 1st St., La Puente.

MEET OUR NEW GENERAL MANAGER, ROY FRAUSTO

We are pleased to introduce Roy Frausto as LPVCWD's new General Manager. He brings water experience, education, and an immense knowledge of the District to the job.

Our Board unanimously agreed that Roy was the best choice to lead the District as it embarks on a new chapter. He has the knowledge and experience to see current projects through to success.

Roy previously worked for the District from 2016 to 2019 as the Engineering and Compliance Manager. He recently returned after serving as the Engineering and Compliance Manager at Rowland Water District. He has also held engineering roles at the South Montebello Irrigation District and State Water Resources Control Board Division of Drinking Water.

Mr. Frausto holds a Bachelor of Science Degree in Civil Engineering from Cal State Los Angeles and a Master of Science in Engineering Management from Cal Poly Pomona.

WATER CONSERVATION TIPS TO HELP YOU SAVE THIS YEAR

California is experiencing a historic drought. Small changes help add up to large water savings! We are sharing some ideas to help you conserve water and money.

INDOOR

Run only full loads in your washing machine and dishwasher

Install aerators or flow restrictors in sinks and showers

Test your toilet for leaks by using dye tabs or food coloring in the tank

Check your faucets, shower heads, and plumbing joints for leaks

OUTDOOR

Water in the early morning or evening when temperatures are cooler

Plant native and low water use plants that are beautiful and water friendly

Install a weather-based irrigation controller or smart controller

Check sprinklers for over spray or leaks and adjust accordingly

WWW.LAPUENTEWATER.COM/WATER_SAVING_TIPS

NITRATE TREATMENT PROJECT

The District is focusing on nitrate treatment to continue to provide a reliable water supply into the future. Nitrate is a widespread contaminant in groundwater that is largely associated with historical farming practices and the use of fertilizer in agricultural fields. In recent years, nitrate levels at the District's Wells 5, 3 and 2 have been on an increasing trend that have resulted in average treated water near 80% of the 10 mg/l Maximum Contaminant Level (MCL) for nitrate. To proactively mitigate the increase in nitrate concentrations and to ensure we have an adequate supply of quality drinking water for our customers, both now and in the future, LPVCWD is working with Evoqua Water Technologies to implement a regenerable ion exchange (IX) treatment system. The new treatment system will be incorporated into the District's existing Treatment Facility as shown below:

1. Air Stripping Towers remove Volatile Organic Compounds (VOCs) to below detection levels.
2. A single pass ion exchange system uses resin specifically manufactured to remove perchlorate.
3. A regenerable ion exchange system uses resin specifically manufactured to remove nitrate
4. A hydrogen peroxide injection system injects hydrogen peroxide in preparation for the UV reactors.
5. UV reactors treat for NDMA and 1, 4-Dioxane.
6. Water exiting the facility is chlorinated to provide a disinfectant residual in the water system.
7. Treated water then enters the water system and is delivered to your home.

The mission of the La Puente Valley County Water District is to provide its customers with high quality water for residential, commercial, industrial and fire protection uses that meets or exceeds all local, state and federal standards and to provide courteous and responsive service at the most reasonable cost. For these reasons, LPVCWD maintains a proactive vision to ensure a high-quality water supply for its community of today and tomorrow.

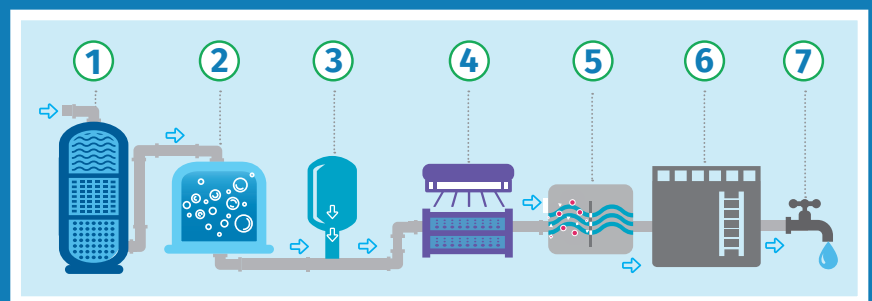

GROUNDWATER CLEANUP: PVOU-IZ TREATMENT FACILITY IN FINAL STAGES OF CONSTRUCTION

The District has been diligently working on the final groundwater treatment area, the Puente Valley Operable Unit (PVOU) and we are excited to announce that our project team has successfully navigated through requirements from various stakeholders, including the USEPA and the Regional Water Quality Control Board – Division of Drinking Water. The PVOU consists of three sub-projects: the Shallow Zone North, Shallow Zone South and the Intermediate Zone (PVOU IZ), which is the most critical in preventing migration of water contaminants.

Construction of the extraction wells and conveyance pipelines are complete at this time, and the construction of the treatment plant is approximately 90% complete. The PVOU IZ interim remedy consists of seven groundwater wells. The extracted groundwater will be conveyed through over three miles of pipelines to a three million gallon per day treatment plant, which will treat water for potable use as shown in the diagram.

1. **Liquid-phase granular activated carbon (LGAC)**
Liquid-phase granular activated carbon (LGAC) vessels for treatment of volatile organic compounds (VOCs)
2. **Single pass ion exchange (SPIX)**
Ion exchange (IX) resin vessels for treatment of perchlorate
3. **Hydrogen peroxide injection**
A hydrogen peroxide injection system injects hydrogen peroxide in preparation for the UV reactors
4. **UV reactors**
Ultraviolet oxidation (UV/Ox) system for treatment of 1,4-dioxane
5. **Reverse Osmosis**
Reverse osmosis (RO) membrane system for removal of total dissolved solids and inorganics.
6. **Chlorination**
Water exiting the facility is chlorinated to provide a disinfectant residual in the water system.
7. **Enters water system**
Treated water enters the water system and is delivered to your home.

Construction is anticipated to be substantially completed by the end of 2021. The completion of this project makes great strides for future generations and our commitment to a high quality, reliable water supply.
